“Cercavo un vaso di buone dimensioni dove trapiantare i pomodori. Il materiale è resistente ed è comodo il sottovaso integrato. Consiglio di mettere dell'argilla espansa sul fondo per migliorare il drenaggio dell'acqua in eccesso.”

“I was looking for a pot with good dimensions to transplant the tomatoes. The material is resistant and the integrated saucer is smart. My advice is to fill the pot with some clay pebbles to improve the drainage of the excess water.”

“Ich suchte einen großen Topf um Tomaten zu pflanzen. Das Material ist hier beständig und der integrierte Unter-setzer ist praktisch. Für eine gute Drainage empfehle ich den Topfboden mit einer Blähton-schicht zu füllen.”

Essential Self Watering

Riserva d'acqua

La riserva d'acqua permette di alimentare le vostre piante senza bisogno di irrigarle spesso. I fori di drenaggio per il "troppo pieno" permettono di scaricare eventuali eccessi di acqua così sarà la pianta stessa ad attingere alla riserva d'acqua quando ne avrà bisogno.

Water reserve

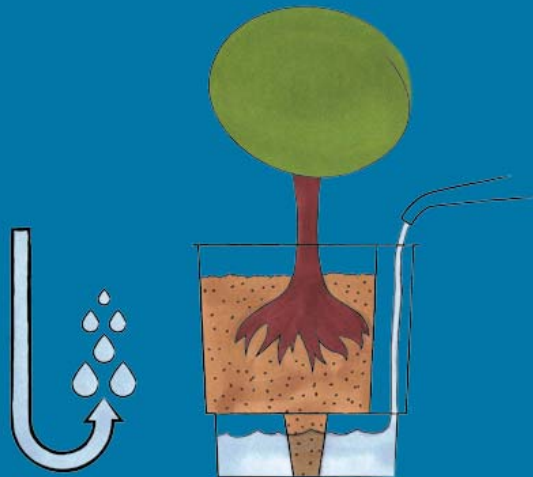

The water reservoir allows to feed your plants without having to water it often. The drainage holes for the "overflow" allow you to download any excess water so the plant itself will be to draw on the reserve of water when it needs them. Some of the pots equipped with this system also have a coating membrane that, once removed, it allows excess water to leak from the pots.

Avec reserve de l'eau

Le réservoir d'eau permet de nourrir vos plantes sans avoir à les arroser souvent. Les trous de drainage pour le «débordement» vous permettent de télécharger tout excès d'eau de sorte que sera elle-même à puiser dans la réserve d'eau quand il en aura besoin. Certains des pots équipés de ce système ont également une membrane d'enrobage qui, une fois enlevé, permet à l'eau en excès de sortir

Wasser reservoir

Das Wasser-Reservoir ermöglicht, Ihre Pflanzen zu versorgen, ohne ständig Wasser zuzuführen. Die Entwässerungslöcher lassen das Wasser überlaufen, damit die Pflanze das nach Bedarf schöpfen kann. Einige Pflanzgefäße mit Wasserspeicher besitzen eine Abdeckung-Membrane, die das Wasser, bei Wegnahme, überlaufen lässt.
